25X1

2. Drug Abuse [redacted] OMS

25X1

[redacted] displayed samples of drugs and authentic drug gear and gave a talk on the dangers of drug usage. This display will be shown on the first floor in a few weeks time. A larger display will be shown in the auditorium 13/14 October in conjunction with BNDD's talks.

25X1

[redacted] pointed out the difference between addiction (physical) and habituation (mental).

3. ASPIN - Automated Systems for the Production of Intelligence - [redacted]

The ASPIN report has no status at the present time; no action has been taken as yet. It stems from a PFIAB charge that the Agency didn't make sufficient use of ADP. The ASPIN charter was to study present use and possible additional use of ADP and to develop specifications for a general system. It took 54 weeks to develop the report. A staff of 12 professionals and 2 clericals was assigned to the task.

Some of the findings

ADP in Intelligence - generally excellent, but some difficulty with the large systems, e.g. CHIVE, COINS.

Canalized info flow - they see CRS as the traffic cop for requests - not as "all thing to all men."

A need for a large data management system - to establish order.

Poor management - a consistent complaint - but hard to get a handle on it. Need centralization.

SECRET

SECRET

ADP encouraged - ASPIN had a good effect. Internal improvements were voluntarily made.

ADP technical attitude - too much jargon; tend to do more than required.

Time factor - customer and ADP technical people have trouble communicating, re goals, objectives.

Lack central point of control for any given application.

Considerable overlap - RID, CRS, OCS - in program development.

Recommendations:

Integrate collection, communications and ADP systems.  
Need standard formats and procedures.

Acquire data management system for commercial source.

Retain developmental capability.

Enhance communication.

Expand interactive system.

Combine interactive applications.

Evaluate COINS.

IPB pursue standards.

Eliminate ORD computers.

Organization and management - centralize computers and project review. - ADP Career Service - headed by D/OCS.

The IPB members are studying the implications of the report.

DTR would like copies of the report. He mentioned the need to explain ADP to non-technical students; Mr. Coffey referred him to
